

Mötesprotokoll TDA367

Grupp 16

Adam Andersson, Max Fransson, Anders Magnusson, Albin Söderberg

October 8, 2018

1 Objectives

-Resolve any issues preventing the team to continue.Short clear descriptions:

Should exercises contain a "Description" string aswell as a "Instruction"?

Active workout functionality

2 Reports

- Each group member reports outcome of assigned issues, see also 'outcomes and assignments'.

Max: *Migrate View functionality from ViewPager to Fragment Container, work on UML and RAD* - The Fragment Container has been implemented and the ViewPager has been removed. All the fragments now contain functionality for use with the Main Activity Fragment Container. A first draft of the UML has been completed for use with the RAD

Anders: *Work on connecting the view with the model as more view code is added in.* - Updated viewModel and made all the views use it in the same consistent way. Worked on the ExerciseDetailView and the ExerciseCreator to make them fully functional. Fixed the problems with the viewModel tests.

Adam: *Work on adding functionality to the exercise based fragments, continue with the RAD.* Implemented a remove button for custom exercises and a detailview of their own (has been updated since then) also been writing on the RAD

Albin: *Continue to work on list functionality in WorkoutTab and ExerciseTab.* - Added small changes to exerciseDetailView. Worked on WorkoutCreator functionality: Workouts can now be created, and will be added to the list

of workouts. When creating a workout you can now add WorkoutBlocks, by selecting exercises from a checkbox-list.

3 Discussion items

Discuss the identified issues, and possibly new or more general issues (very short notes and/or keywords).

- Is there a need for a "description" as well as a "instruction" for exercises
- Where and how to display the active workout
- Should the bottom navigation bar always be visible

4 Outcomes and assignments

Outcomes from discussion items. Write down what's decided and why it was decided. Sync with other documentation (add terms to wordbook).

Description will be removed for now as it is deemed unnecessary at the moment. It will be replaced with a list of categories.

- (re)Assign to each group member which issues to solve.

Max: Start creating the ActiveWorkoutFragment and functionality, work on Serialization to save and load User data between sessions

Anders: Start working on the workout creator (specifically how to make it work with WorkoutBlocks).

Adam: Give workouts remove and edit buttons as well as the functionality surrounding them.

Albin: Work on displaying WorkoutBlocks in WorkoutCreator and WorkoutDetailView, and improve the way the lists of exercises/workouts are displayed.

5 Wrap up

- Write down any unresolved issues for next meeting.
- Decide a time and location for next meeting.

Wednesday 10/10 EDIT Building
