

# Week 1:

## Meeting 1:

### # Meeting Agenda

Group: TrainingTracker (16)

Date: 7/9

Chair:

Participants: Albin Söderberg, Adam Andersson, Anders Magnusson, Max Fransson

### ## Objectives (5 min)

#### - Discuss the goal of the project

To create an Android application that facilitates the user's experience at the gym, by recording the user's progress and allowing the creation of custom workout schedules

Show statistics and diagrams over time for the preformed exercises.

#### - Write down user stories for the app

User stories are added to Trello workspace

### ## Reports (15 min) from previous meeting

- No previous meetings

### ## Discussion items (35 min)

- Discuss the identified issues, and possibly new or more general issues (very short notes and/or keywords).

Feasibility of generating diagrams from data in an Android environment

How extensive the application should be in terms of available exercises and information

Calendar integration into the app

Pre-set workouts

Custom workout routines

Add exercises and specify which muscles it targets

## **## Outcomes and assignments (5 min)**

- Outcomes from discussion items. Write down what's decided and why it was decided. Sync with other documentation (add terms to wordbook).
- (re)Assign to each group member which issues to solve.

The discussion items will be prototyped to assess the feasibility of implementing them into the final product

## **## Wrap up**

- Write down any unresolved issues for next meeting.

During next meeting: Focus on writing down more user stories, divide them into tasks and epics, and start planning the domain model.

Getting Android studio and Gradle up and running

- Decide a time and location for next meeting.

Next meeting: Monday 10/9.
